- Patented category view for at-a-glance review of relevant changes

- Automatic alert and comparison of modified attachments

- Efficient change searching for quicker results

- Easy installation, integration, and management

- Additional APIs for custom DMS/ECM integrations

Fast, accurate document comparisons with visualization and tracking tools to help you progress reviews more confidently and much faster.

Complex document comparisons faster and accurately

Reduce reviewing cycles and eliminate risk when comparing PDF or Word file documents. Easily and accurately compare all content in high-value and lengthy documents – including auto-numbered paragraphs, font changes, and formatting. Compare 8 even shows changes in Microsoft Excel tables embedded within Microsoft Word documents.

Multiple comparison choices

With Workshare Compare 8, you can compare documents and view changes in the way that best suits your workflow. Compare documents directly from Outlook, from within Microsoft Word, or from your desktop using the standalone app.

Easily review the changes that matter to you

Workshare's patented category view organizes the changes so you can drill down directly to the ones that are the most relevant, improving efficiency during the review cycle and reducing time and cost. Changes can be ordered by category, list view, or status, ensuring none of the changes go unseen.

- *EContent* names Workshare Top 20 Industry Leader

- Workshare honored with *Tomorrow's Technology Today* Award

- Microsoft awards Workshare ISV/Software Solutions Partner of the Year

Compare one document to multiple versions

Compare more than two documents at one time, Word or PDF files, including image based ones. The three-pane view automatically highlights differences for easy identification of what has been changed.

Save comparisons

Save the comparison as a Workshare Compare DeltaFile – a valuable control document containing the original and modified documents, and redline. You can also save the redline document as a DOC/DOCX, RTF, HTML, TXT, PDF or PDF/A file.

Secure, open XML document exchange

Interoperability and compatibility between later Microsoft Office and previous Office version file formats ensure business continuity and reduced support costs. Accurate comparison is ensured regardless of the file format version used and exchanged.

Extend your document management system

Out-of-the-box integration between Compare 8 and document management systems of record such as SharePoint, iManage, OpenText, Documentum or NetDocuments allows users to compare files directly from their familiar interface, reducing the time dedicated to change management processes.

Document redlining made simple

Customize and control what changes you're shown and how they're displayed in the redline document, making it easier to see and understand changes. Using Microsoft Word Track Changes, or other redline formats, you can share redlines without risk of misinterpretation or missed changes.
