What is Workshare Compare

Workshare Compare reimagines multi-party review and collaboration and ensures the safe and accurate exchange of information, enabling the collaborative evolution of high value business documents.

Workshare Compare is a desktop application that automates managing changes to business documents.

Key features of Workshare Compare include:

- Comparison of Word, PowerPoint and PDF files, including image-based PDF files
- Ability to accept/reject in a comparison and then create new documents
- Advanced comparison features for Word and PDF files including one-to-many comparisons, version comparisons, and access from within Word and PowerPoint
- Conversion from PDF to DOC format for local files and from within the DMS/CRM
- Options to save and share Office documents to Workshare online
- Access and visibility into online collaborative workspaces directly from Office
- Secure file sharing from all devices and browsers with metadata removal and end-to-end encryption
- ECM/DMS and OCR integration with desktop comparison features
- Centralized user account management and control
- Complete access to Workshare online functionality to share and collaborate on documents, including setting folder access and permissions, positional commenting and reviewer communications with presence indicators
- Desktop sync app to synchronize your online content to your local desktop

Note: *Workshare Compare can be installed without Microsoft Office integration. In this case, the comparison functionality is only available from the Workshare Compare application.*

What's New in Workshare Compare 9

Workshare Compare 9 includes the following new features:

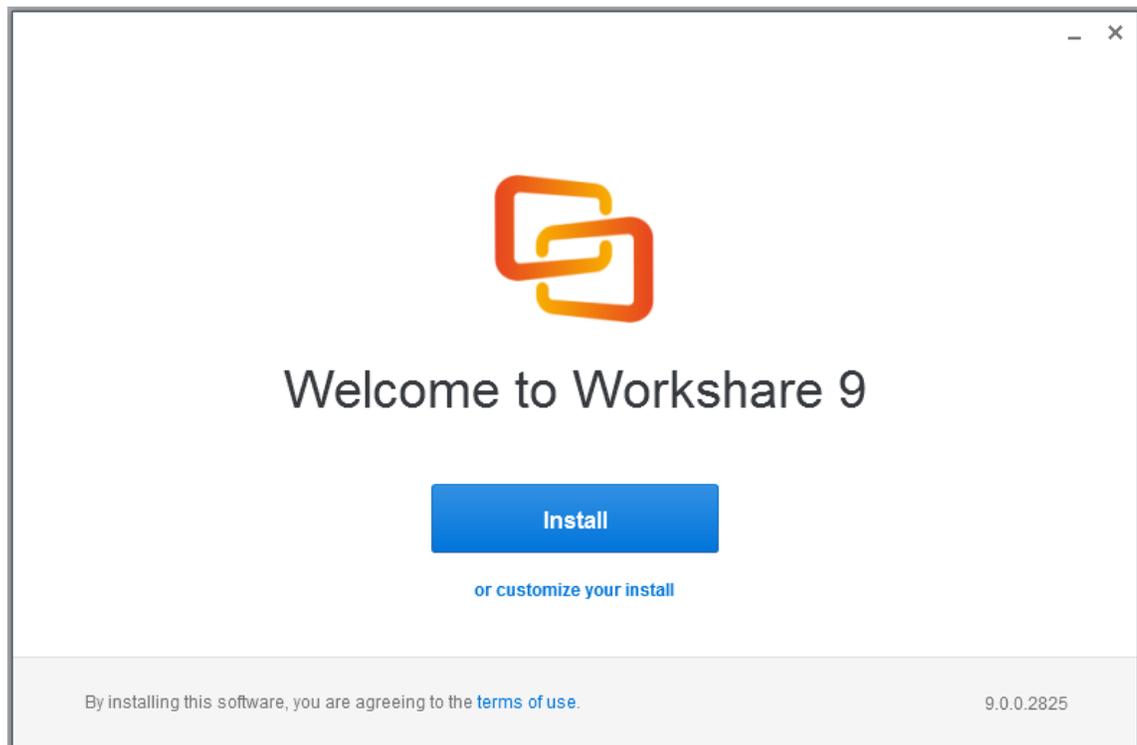

Office 64-bit support

This release includes a full 64-bit version of Workshare Compare 9. This is a 64-bit application that includes the full feature set of Workshare Compare. Previously, we had a standalone version of Workshare Compare that worked in a 64-bit Office environment. It had a limited feature set. Full system requirements are provided on page 18.

Install

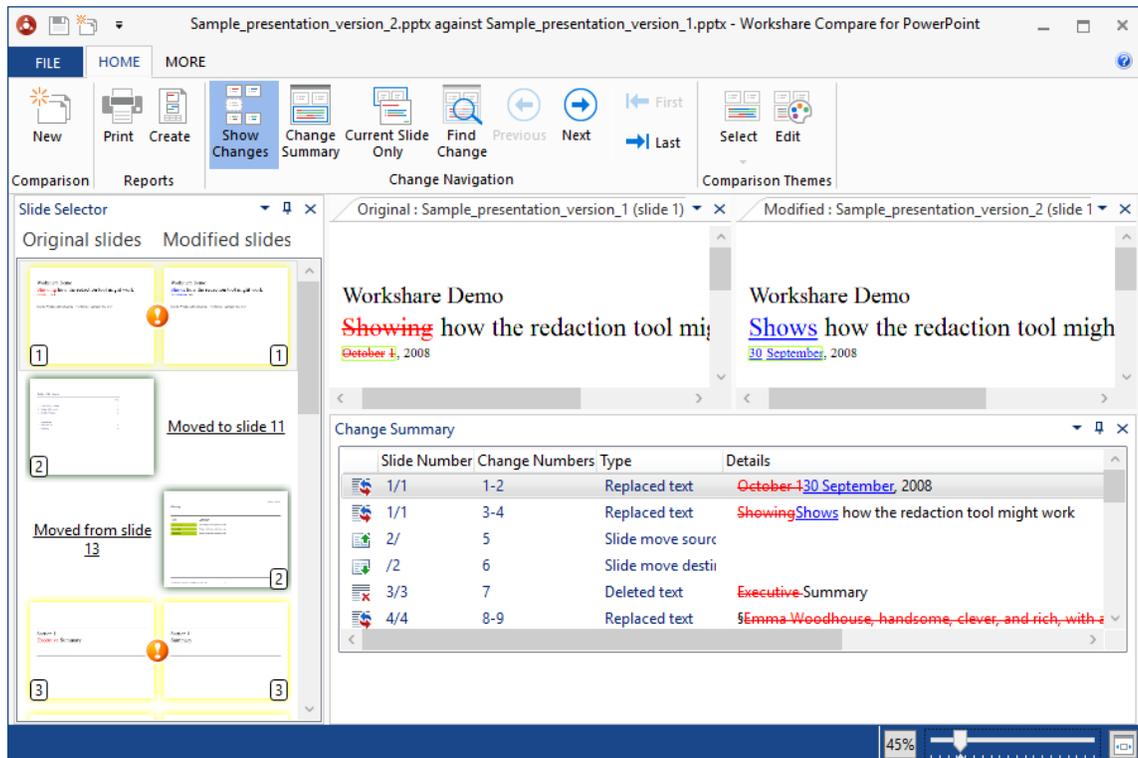

Workshare Compare 9 installs more smoothly with less user interaction required and installs fewer add-ins. For example, in Outlook, there is only one add-in and in Word, there are only two add-ins.

There is also rebranding and new messaging on the installation screens.

PowerPoint comparison

You can now compare two PowerPoint presentations and review the differences between them. You can see whether entire slides have been moved or deleted as well as what changes have been made to text and objects within each slide. PowerPoint Compare is available from the desktop, from within an open presentation and by right-clicking a closed presentation both locally and in your DMS.

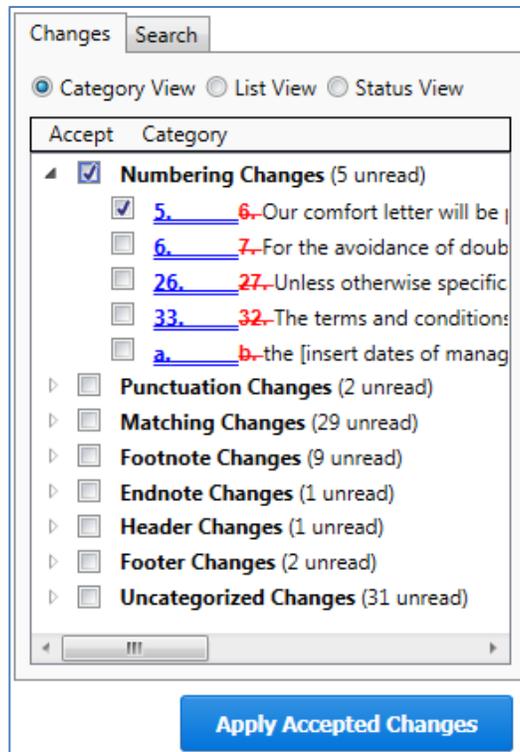

UI modernization

The Workshare Compare for PowerPoint user interface has been modernized to make comparing documents an easier and more satisfying experience. The ribbon has changed – the icons are more relevant and reflective of their function and the options have been rearranged so that what is most wanted and used is easier to get.

Apply changes in Compare

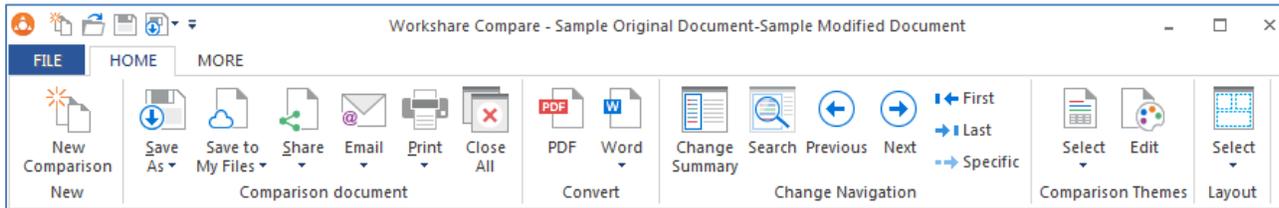

Compare 9 includes the ability to accept and reject changes and create a new document. This brand new functionality places Compare at the center of the review and comparison document lifecycle. You can easily understand the changes made to a document and you can focus on the changes that you care about using categories, and now you can create a new version of the document that includes all the changes you accepted and excludes all the changes you rejected.

You can accept and reject from all views in the Change Summary and then save into a new document or save the comparison (redline, original and modified) with your accept/reject selections as a Workshare Deltafile (WDF).

Compare UI modernization

The Workshare Compare 9 user interface has been modernized to make comparing documents an easier and more satisfying experience. The ribbon has changed – the icons are more relevant and reflective of their function and the options have been rearranged options so that what is most wanted and used is easier to get.

Category view

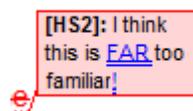

Grouping changes into categories in Compare saves time when reviewing redlines so you can focus on important changes. Categories are not new but the ability to accept/reject an entire category of changes in one go is new and this introduces a fast and efficient review process.

When redlines are extremely long, there can be so many changes that it takes too much time to review them. Some of these changes you may not care about - a lawyer may not be interested in a font change (although a documentation manager would); some of these changes you definitely want to accept without any need for review. For example, the **Spelling Corrections** category includes spelling correction changes and you may be happy to bulk accept such changes. The **Word Variations** category includes changes where a word has been varied grammatically but not in meaning, such as fix changed to fixed or fixing, and again you may be happy to accept all of this type of change. The **Matching Changes** category includes changes that are the same like a name change from Client 1 to Client 2 in 200 different places and you can quickly accept them all in one go.

Comparison of comments

We have always compared comments – as long as the **Display comments in Redline** parameter is selected in the Rendering set (**Comparison Options**). This parameter is off in the default rendering sets.

We have improved the way we show changes in comments. Prior to Update 5, comments were pulled into the body of the document and compared there. Now, they are maintained as comments so it is very easy to see that changes have been made to a comment.

Also, there is a new category in Category View called **Comment Changes** that groups all changes to comments together.

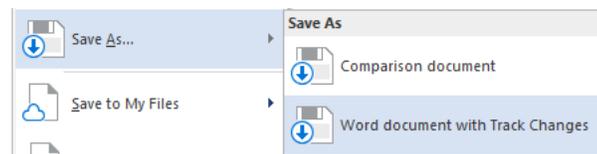

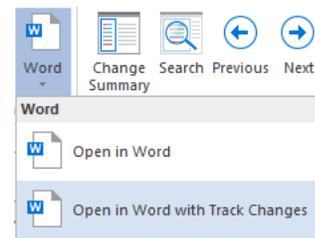

You cannot apply changes to comments. A user can still select the checkbox next to a comment change but when clicking **Apply Accepted Changes**, the changes will not actually be accepted.

Track change output

The Compare 9 ability to convert redlines to documents with track changes is greatly enhanced. Compare no longer uses Word for the conversion and redlines no longer include Workshare styles so the whole process is now faster and more accurate. Using this process, the changes are converted to track changes and you can implement the changes using Word's track changes functionality.

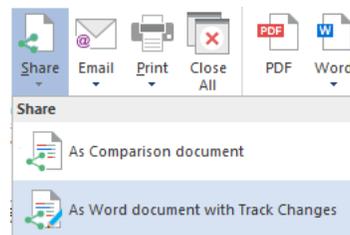

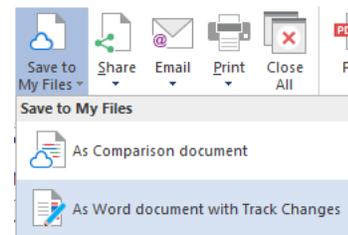

The convert to track change functionality is available from many places:

Convert the open redline to a track change document - In the **Home** tab, click **Word** and then **Open in Word with Track Changes** or right-click in the redline and select **Convert to Track Changes**.

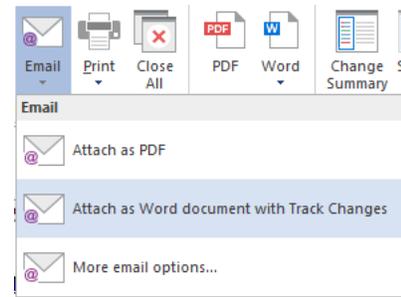

Save the redline as a track change document – click **Save As** and then **Word document with Track Changes**.

Save the redline to Workshare Connect as a track change document - click **Save to My Files** and then **As Word document with Track Changes**.

Share the redline on Workshare Connect as a track change document - click **Share** and then **As Word document with Track Changes**.

Email the redline as a track change document - click **Email** and then **Attach as Word document with Track Changes**.

Comparing from NetDocuments

When using Send to Application in NetDocuments, the Compare document selection dialog will now be displayed by default. This means users can further define their comparisons. For example, they can switch the original and modified documents or they can add further documents to compare. They can also change the rendering set applied and use the Fast comparison mode.

This is controlled by the **Display document selection dialog when using Send to Application** parameter in the WCM (**Integrations>NetDocuments**).

Emailing changes only

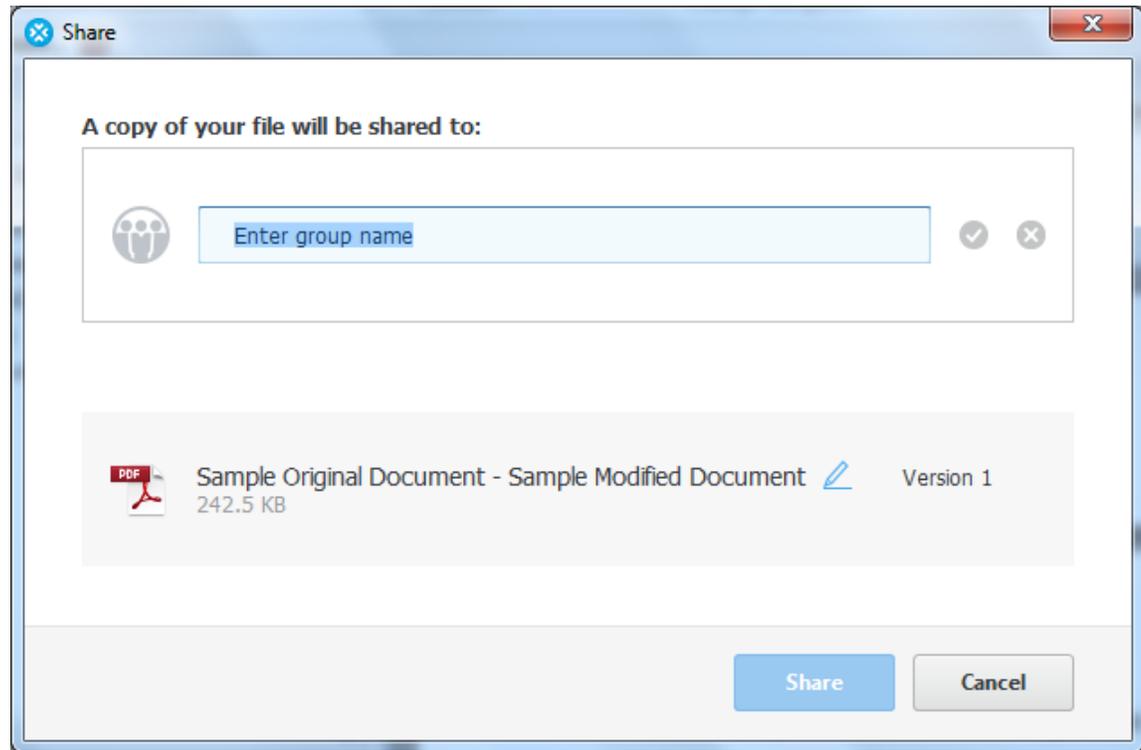

There is a new option in Workshare Compare that enables users to send only the pages with changes when sending redline documents by email. The option is called **Attach as PDF (only pages with changes)** and is found under the **Email** option in the **Home** tab or File menu. This is useful when comparing lengthy documents and changes only appear on a few pages. Using this new option, only the changed pages in the redline are converted to PDF and a new email window is opened with the PDF attached.

Compare footnote changes

Users have always been able to compare footnotes and endnotes using the **Compare Footnotes** parameter in the rendering set. Now there are 2 parameters relating to footnotes/endnotes. The new parameter (added to **Comparison Options**) is called **Detect Footnote/Endnote Numbering Changes**. This way users can still detect changes to footnotes/endnotes but they can choose NOT to detect changes to footnote/endnote numbering.

Saving and sharing redlines to Workshare online

With Connect installed, you can save redlines to Workshare online so they will be accessible to you online at all times and you can share redlines to groups in Workshare online so you can collaborate on them with others.

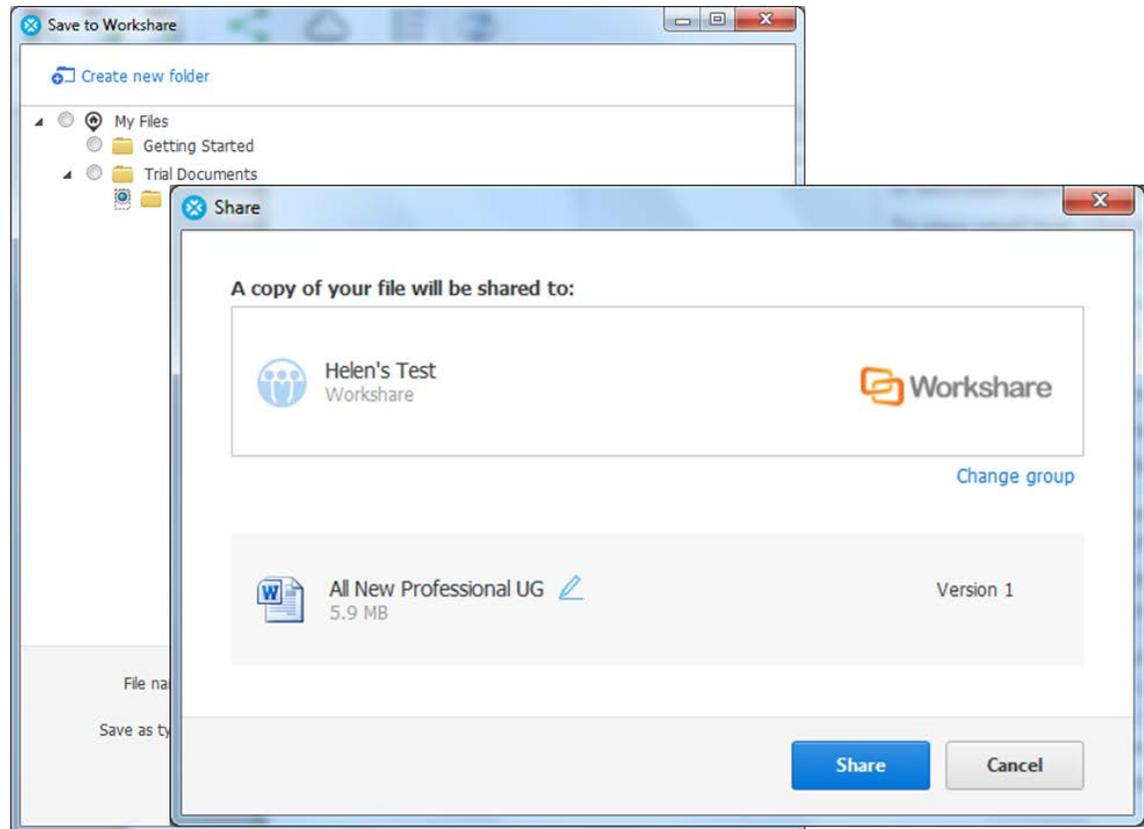

You can save the redline as a Workshare Compare DeltaFile (WDF), which contains all three documents (original, modified and redline) as well as your 'Accept' and 'Flag' selections. You can also save just the redline as a DOC/DOCX, RTF, HTM, TXT or PDF file or you can save the redline as a track change document. The redline is saved to **My Files** (inside **Folders** in Workshare online).

You can share the redline as a PDF file or you can share the redline as a track change document. The redline is shared to a group in Workshare online and a link to the redline is sent to group members by email.

Save/share to Workshare online from Microsoft Office

With the Connect element installed, you can save your Office documents to Workshare online so they will be accessible to you online at all times and you can share your files to groups in Workshare online so you can collaborate on them with others.

You can save and share Word, Excel and PowerPoint files in their native format or converting them to PDF as you save or share. The file is shared to a group in Workshare and a link to the file is sent to group members by email.

Workshare desktop app

The installation of the Connect element includes an updated desktop app - the application that syncs content between Workshare online and your desktop. This means that even when offline, you can access and review your Workshare content. You can also add updated files or new files and as soon as you are online again, they will be synced.

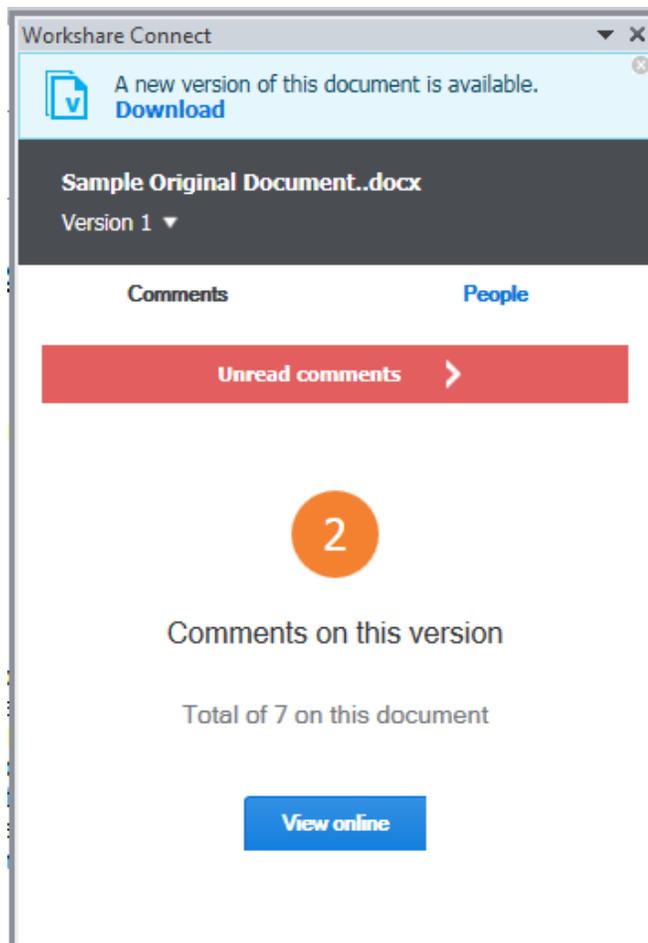

If your Compare installation is integrated with a DMS, the desktop app benefits from this integration too. This means, for example, when adding files to the desktop app, the default open location will be the DMS. This can be switched off in Preferences in the desktop app.

The desktop app is launched after installation of Compare and you sign in to Workshare once to retrieve license information and begin synchronization. A welcome page is displayed in desktop app.

The interface of the desktop app is very similar to that seen when accessing my.workshare.com through a browser.

Workshare online inside Office

With the Connect element installed, you can display the Workshare Connect panel inside Office which provides a window into your shared documents in Workshare online. When you have shared a document into a collaborative workspace in Workshare online and you open the document locally, the Workshare Connect panel provides a view of what is happening with your collaboration. You can see the other reviewers (who you shared the document with) and whether they are online at the moment. You can also see how many comments have been made on the document and whether any new versions have been added to it. With a single click you can open the document in the Workshare web app and join in the collaboration by viewing comments and making your own comments.

When another reviewer adds a new version of the document, you are notified in the Workshare Connect panel. With a single click, that new version is opened in Word. Now the Workshare Connect panel will ask if you'd like to see what's different between this new version and the previous version. With a single click, both versions are compared in Workshare Compare.

NetDocuments integration

The NetDocuments integration now includes the ability to convert documents to PDF from within NetDocuments using the send to application functionality.

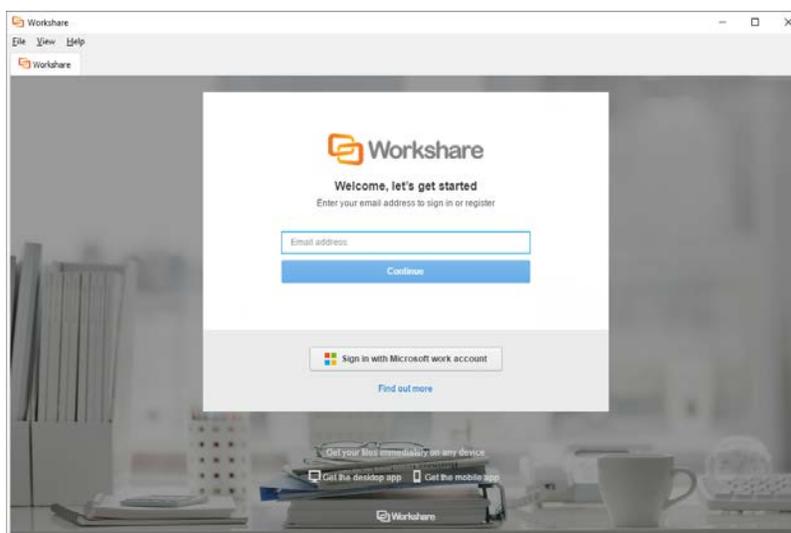

Click-to-run certification

Workshare 9 is now certified with Microsoft's click-to-run. Click-to-run is a Microsoft streaming and virtualization technology that is used to install and update Office products.

Licensing Change

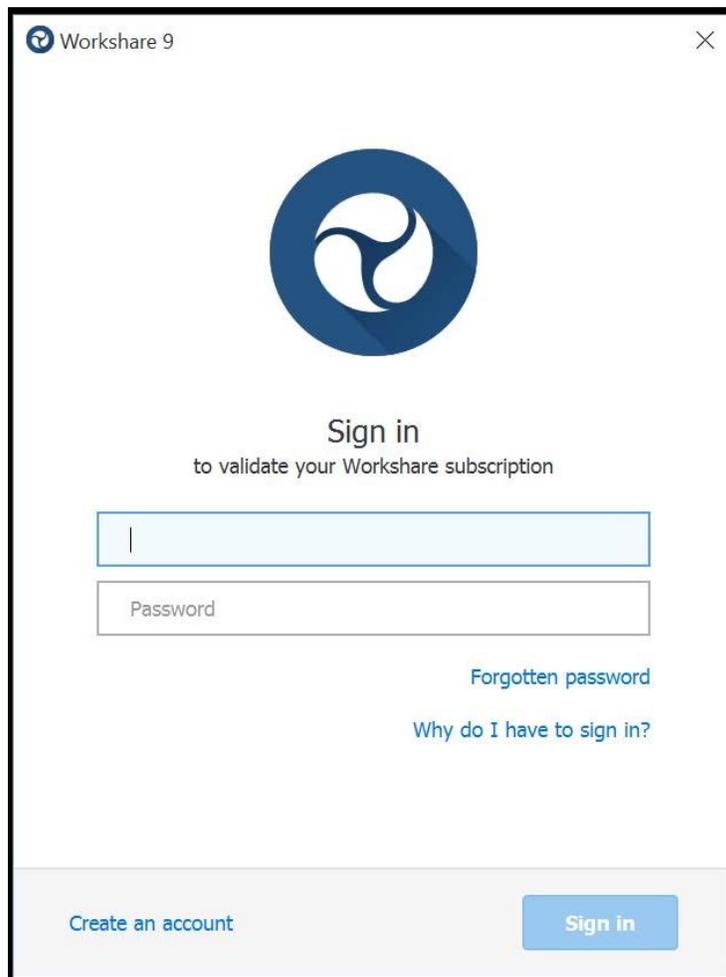

Licensing of Workshare is done via my.workshare.com. When purchasing a Workshare product, you are required to create a Workshare account. A license entitlement is created and assigned to the account, waiting to be used. After installation, you are prompted to log in to your Workshare account in order to retrieve your license entitlements. This can be in either of the following ways:

- When File Share & Sync (the Connect element) is included in the installation, the Workshare desktop app is launched after install and you will see the following:

If you do not log in at this point, then.....

- The first time you access Workshare functionality, for example, by clicking any option in the Workshare tab, you will see the following:

The image shows a screenshot of a 'Workshare 9' sign-in dialog box. At the top left, it says 'Workshare 9' with a checkmark icon, and at the top right, there is a close button 'X'. In the center, there is a large blue circular logo with a white stylized 'W' inside. Below the logo, the text reads 'Sign in' followed by 'to validate your Workshare subscription'. There are two input fields: the first is empty with a vertical cursor, and the second is labeled 'Password'. Below the password field, there are two links: 'Forgotten password' and 'Why do I have to sign in?'. At the bottom, there is a light gray bar containing a link 'Create an account' on the left and a blue 'Sign in' button on the right.

Enter your Workshare credentials (email address and password) and click **Sign in**. Your license entitlements are retrieved and you have access to all Workshare functionality. This is the only time a user is required to log in to Workshare.

Options removed

Some options that were previously available in Compare have been removed because the functionality is now available in a better and more accessible way. You will no longer see:

- Vertical Workshare panel in Office
- Comparing within Word

System Requirements

The system requirements for Workshare Compare 9 are as follows:

Minimum System Requirements	Intel Pentium 4 3.2GHz processor 1.5GB RAM 1GB free disk space
Recommended System Requirements	Intel Core 2 DUO @ 2.2GHz AMD Athlon 64 X2 4400+ 2GB RAM 2GB free disk space

Certified environments for Workshare Compare 9 (32-bit version)

Workshare Compare 9 (32-bit version) has been tested and certified in a number of environments. If your environment is not included in the following list, it may still be a compatible environment. Contact Workshare Customer Support (support@workshare.com) for any help.

For details of which environments previous versions of Workshare Compare were certified against, refer to previous versions of release notes on the knowledge base.

Note: *Unless otherwise stated, all environments are the English version with the en-us language set.*

Operating System:

- Microsoft Windows 10 (32 bit and 64 bit)
- Microsoft Windows 8.1 (32 bit and 64 bit) + Japanese
- Microsoft Windows 7 SP1 (32 bit and 64 bit) + Chinese Simplified & French

Citrix:

- With Microsoft Windows Server 2012 R2 (64 bit)
 - Citrix XenApp 7.5
 - Citrix XenDesktop 7.5
- With Microsoft Windows Server 2008 R2 SP1 (64 bit)
 - Citrix XenApp 6.5
 - Citrix XenDesktop 6.5
 - Citrix XenDesktop 5.6

Note: Check with your Citrix vendor about which Windows operating system supports your version of Citrix.

Microsoft Office System:

- Microsoft Office 2016 (32 bit) – including click-to-run
- Microsoft Office 2013 SP1 (32 bit) + Japanese – including click-to-run
- Microsoft Office 2013 (32 bit) + Japanese
- Microsoft Office 2010 SP2 (32 bit) + Chinese Simplified & French
- Microsoft Office 2007 SP3 (32 bit)

Email System:

- Microsoft Outlook 2016 (32 bit)
- Microsoft Outlook 2013 SP1 (32 bit) + Japanese
- Microsoft Outlook 2013 (32 bit) + Japanese
- Microsoft Outlook 2010 SP2 (32 bit) + Chinese Simplified & French
- Microsoft Outlook 2007 SP3 (32 bit)
- IBM Lotus Notes 9.0.1
- IBM Lotus Notes 9.0

Browsers:

- Microsoft Edge, latest version
- Microsoft Internet Explorer 11
- Google Chrome, latest version
- Mozilla Firefox, latest version

Microsoft SharePoint:

- Microsoft SharePoint 2013 SP1

DMS Integration:

Note: Check with your DMS vendor about which Windows operating system supports your DMS.

- **NetDocuments**

Note: If you want Workshare to be available when using the NetDocuments **Send to application** functionality, Microsoft Internet Explorer must be installed (although it does not have to be the default browser).

- **iManage:**
 - FileSite 9.3.1
 - FileSite 9.3
 - FileSite 9.2
 - FileSite 9.0 Update 6
 - FileSite 9.0 Update 5 (+ EMM)
 - FileSite 8.5 SP3 Update 5/6
 - DeskSite 9.3.1
 - DeskSite 9.3
 - DeskSite 9.2
 - DeskSite 9.0 Update 6
 - DeskSite 9.0 Update 5
 - DeskSite 8.5 SP3 Update 5/6
- **OpenText:**
 - eDOCS DM 10
 - eDOCS DM 5.3.1 COM only (Patch 5)
 - eDOCS DM 5.3 COM only (Patch 5 Rollup 4 & 5)
- **Worldox:**
 - GX3
 - GX4

Workshare will endeavor to support future service packs of certified environments.

Certified environments for Workshare Compare 9 (64-bit version)

Workshare Compare 9 (64-bit version) has been tested and certified in a number of environments. If your environment is not included in the following list, it may still be a compatible environment. Contact Workshare Customer Support (support@workshare.com) for any help.

For details of which environments previous versions of Workshare Compare were certified against, refer to previous versions of release notes on the knowledge base.

Note: *Unless otherwise stated, all environments are the English version with the en-us language set.*

Operating System:

- Microsoft Windows 10 (64 bit)

Citrix:

- With Microsoft Windows Server 2012 R2 (64 bit)
 - Citrix XenApp 7.5

- Citrix XenDesktop 7.5

***Note:** Check with your Citrix vendor about which Windows operating system supports your version of Citrix.*

Microsoft Office System:

- Microsoft Office 2016 (64 bit) – including click-to-run

Email System:

- Microsoft Outlook 2016 (64 bit)

Browsers:

- DeskSite 9.3 (64 bit)

- **OpenText:**

- eDOCS DM 10 (64 bit)

Workshare will endeavor to support future service packs of certified environments.

Important Information

- **Secure PDFs** – Workshare Compare is unable to compare secure PDFs or convert secure PDFs to Word format. Secure PDFs are PDF files with security settings configured.

Important installation information

- Workshare Compare installs program files to a sub-folder within the Workshare folder named **Modules**.
- **Install:** A user is unable to install Workshare Compare if Microsoft Windows Installer 3.1 is not installed. This can be downloaded from the following location <http://www.microsoft.com/downloads/details.aspx?FamilyID=889482FC-5F56-4A38-B838-DE776FD4138C&displaylang=en>.
- **Windows 7:** When UAC is set to **Default**, running the Workshare Compare install displays the UAC prompt. You must approve the prompt and Workshare Compare will be installed. Running the Workshare Compare MSI silently will fail when UAC is set to **Default** because the user is not given the opportunity to approve the UAC prompt. Therefore for silent installs, disable UAC.

If you have installed any Alpha or Beta builds of Workshare Compare, we strongly recommend that you first uninstall them before installing Workshare Compare 9.

Change Requests Fixed

The following are fixed customer change requests that have been validated for this release - for more information, please contact Customer Support.

CR #	FB #	Description
00431065	19552	Local Open or Save dialog box does not appear in Excel
01049923	37955	Comparing a document with multiple versions from DeskSite does not auto-populate the correct versions
01068093	41816	Sending redline from Compare creates 'A program is trying to access email address information
01069681	41926	Unable to save docs with long file-names into NetDocs when include document descriptions is enabled
01072933	42372	Page layout changes from legal to letter and is missing paragraphs when saving fast mode redline to PDF
01072975	42399	Linked signature images are stripped and sent as attachments when sending email with ACN and IP enabled
01073730	42950	Wrong attachment sent when same document name is in use

CR #	FB #	Description
01077148	43136	0 KB document created when saving redline after comparing long file-names documents from Netdocuments
01070304	42009	Unable to compare documents containing comments into 7a
01072685	42813	Workshare Compare for PowerPoint incorrectly being treated as suspicious by certain applications
01066299	41355	Applocker blocking certain Workshare DLLs
01049903	37953	Comments are missing when saving redline as Word document with Track Changes
01081726	43873	Comparing documents with multi-level numbering list displays incorrectly in TER view
01058370	39770	'Do you want to save changes to this message?' dialog pops up when closing Outlook

Known Issues

The following are known issues in the Workshare Compare 9 release - for more information, please contact Customer Support.

ID	Details
01028440	Editing a rendering set on the fly does not prompt to save as a new set or overwrite the current rendering set.
01018577	Worldox document footer stamps are not updated when saving a comparison via Save As in Workshare Compare.
01018743	Font changes to Times New Roman in email body when sending documents to groups from Interactive Protect.
01012100	The account or company name is not displayed in File > Help > About in Workshare Compare.
42137	'Index was out of range. Must be non-negative and less than the size of the collection.' Error is displayed when comparing certain PowerPoint files.
41723	Password dialog displayed at inconsistent times in the comparison process depending on whether using Standard or Fast mode (64-bit version only).
41547	Incorrect theme is highlighted under 'Select' drop-down when comparison is done from command line.
41284	Files are not listed in recent comparison list when PowerPoint compare is performed with server documents.
40597	Local File Store dialog is displayed when browsing for files in the desktop app when DMS is set as default (64-bit version only).
40574	User is not automatically logged into Compare after logging into the desktop app first (64-bit version only).
40484	There is a spelling mistake in the 'Change Summary' button tooltip.

ID	Details
40469	Newly created theme does not appear in the 'Select' drop-down list in the Comparison Themes section.
40430	'Color is not resolved yet' error is displayed when at least one document contains Opulent design background.
40418	'Index was outside the bounds of the array' error is displayed while comparing specific documents.
37311	Excel spreadsheet hangs when sharing as an attachment through Outlook.
37230	Incorrect changes appear in redline when comparing certain documents.
35528	Unable to compare .docm files from NetDocuments.
35474	Activated users are still prompted to sign in to license Professional when using the feature "Save to My Files" in Word.
34665	Unable to apply changes to comments.
32336	Unable to customize the original groups in the Compare ribbon.
26902	The Apply accepted changes button is not enabled when the user accepts only changes under the suggested changes category. Issue observed in Windows 8.1(x64) Office 2013 SP1 SharePoint 2013 SP1.
26804	Dotx/docm/dotm/dot/html type documents are not displayed in NetDocuments Open window. Issue observed in Windows 7 SP1 Office 2010 SP2.
26796	Text is not displayed correctly when specific pdf documents are compared. Issue observed in Windows 7 SP1(x86) Office 2010 SP2 FileSite 8.5 Update 5.
26795	Table is not displayed correctly when comparison is saved as PDF document. Issue observed in Windows 7 SP1(x86) Office 2010 SP2 FileSite 8.5 Update 5.

ID	Details
26671	Error is displayed when click Apply agreed changes after comparing a .docm file as the original document. Issue observed in Windows 7 SP1(x86) Office 2010 SP2 FileSite 8.5 Update 5.
26585	License expiry dialog is displayed when logged in as SSO user through share action. Issue observed in Windows 8.1 Enterprise x64-G Office 2013 SP1 DeskSite 9 Update 5.
26584	Account name is not displayed in the WCM > My Products after re-launching WCM. Issue observed in Windows 7 SP1 Office 2010 SP2.
26353	Workshare options are not displayed correctly if display font size changed to 125% or 150%. Issue observed in Windows 7 SP1 Office 2010 SP2.
26309	Exception is displayed in the system tray when performing secure file transfer action on document containing '['(or ']')in the name. Issue observed in Windows 7 SP1 Office 2010 SP2.
26274	Incorrect license alert dialog is displayed when launching PPT Compare from the desktop shortcut and closing the login dialog. Issue observed in Windows 7 SP1(x64) Office 2010 SP2 FileSite 9 Update 5 + EMM.
26241	Save to My Files/Share and PDF are disabled for redline if the Allow redline to be saved... option is not selected. Issue observed in NetDocuments-Windows 8.1 Office 2010 SP2.
26237	File format is shown as PDF/A in Email Comparison window even if PDF documents are selected for comparison. Issue observed in NetDocuments-Windows 8.1 Office 2010 SP2.

ID	Details
26198	Incorrect license alert dialog is being displayed when launching Workshare Compare for PowerPoint application. Issue observed in Windows 8.1(x86) Office 2010 SP2(x86) NetDocuments.
26176	Save As Type is empty and disabled in OpenText DM5 Save As dialog, when saving comparison as version. Issue observed in Opentext DM 5.3.1 patch 5 Windows 8.1 Office 2013.
26107	Document is not auto saved to DM server after performing Share action. Issue observed in Windows 7SP1(x64) Office 2013 SP1 (x86) eDocs DM 5.3.1 Patch 5 (COM Only).
26084	Workshare Compare is launched when right-clicking on PPT/PPTX in Worldox and selecting Compare instead of Compare for PowerPoint. Issue observed in Worldox.
26024	The Workshare Connect icon is not shown in the Control Panel after upgrading in MSI mode. Issue observed in SharePoint 2013 SP1 Windows 8(x64) Office 2013.
25974	Unexpected message is displayed when clicking Apply agreed changes if user compares .rtf files and then opens saved WDF. Issues observed in SharePoint SP1 Windows 8(x64) Office 2013.
25915	Links in Excel files are not cleaned when user deselects Exclude field codes with hyperlinks in the WCM. Issue observed in OpenText DM 5.3.1 COM Suite Patch 5 - Windows 8.1(x64) Office 2013 Outlook.
25913	ADM files do not contain license information when generated in the WCM Admin Mode. Assuming that the license entry is generated, but empty then this is as expected. ADM files can't contain entries that are larger than 256 characters so we don't try.

ID	Details
25617	Error saving.. is displayed when sharing files to a group containing special characters in its name. Issue observed in Windows 7 SP1(x64) Office 2010 SP2 FileSite 9 Update 5 + EMM.
25084	File names with character # (hash tag) cannot be saved as attach/relate to original. Issue observed in NetDocuments Windows 7 SP1 Office 2010 SP2.
24926	Workshare warning dialog is not displayed when user clicks See changes link from PowerPoint in Protect standalone build. Issue observed in Windows 7 SP1 Office 2007 SP3.
23947	WCM options of removed features are still displayed in ADM file. Issue observed in AD Server: Windows Server 2008 Enterprise (X86) SP1; Client: Windows 7 SP1(x64) Office 2010 SP2.
22623	Bullets and numbering changes are not applied to comparison document through Apply agreed changes from Compare. Issue observed in Windows 8.1 X64 Office 2013 SP1 SharePoint 2013.
22054	'No valid launch method is found' error is displayed when launching a .WPF file from DM server. Issue observed in OpenText DM 5.3.1 patch 5 Windows 8.1 Office 2013.
39743	Unable to transfer content from Excel to Word using drag and drop.
39625	Custom fonts and macros not being saved to normal.dotm when Workshare add-in is enabled.
39624	Slide panes are empty and CPU usage is high after comparing certain PowerPoint documents.
39338	'Object reference not set to an instance of an object' error is displayed when comparing heavily formatted PowerPoint documents.

ID	Details
35911	Blank page sometimes displayed after redline statistics in the redline.
34883	Redline Summary columns and description run off page when file name + path are too long.
