Introduction

Workshare Compare is a document comparison tool designed to make the process of editing and revising documents as fast and efficient as possible. Workshare Compare enables you to compare documents – the original document and the modified document – and produce a comparison (Redline) document, enabling you to instantly see any differences between them.

In one view, you can see both the original documents and the comparison document. You can compare a document against another single document or against multiple documents and see the Redline document for each comparison in a different tab.

You can compare Microsoft Word documents (DOC/DOCX files), RTF files and PDF files. Within a Microsoft Word file, you can compare all content including images, tables and embedded Microsoft Excel tables.

For users who have a DMS, Workshare Compare provides access to version information stored in the DMS. Understanding differences between one version of a document and the next is a critical function when editing and reviewing documents in multi-user environments. The Workshare Compare module utilizes Workshare DeltaView - the market-leading and most advanced comparison engine in the market today, to perform comparisons accurately and seamlessly. Comparison results are displayed within Microsoft Word or in a separate Workshare Compare window.

Workshare Compare's fast, accurate and reliable document comparison capabilities enable you to quickly compare even the most difficult and complex documents. You can review the Redline document by navigating between the changes. To make the review easier, you can select different rendering sets to determine how the changes are highlighted within the document. A statistical summary at the end of the Redline document enables you to precisely match the document changes.

In addition, Workshare Compare preserves the technical integrity and style of the document – preventing your document from becoming corrupt or inadvertently incorporating foreign formatting or style. This not only benefits you through higher document quality, but also through increased productivity as well as reducing stress at deadlines.

Alert and Compare is the ability of Workshare Compare to automatically detect that a received attachment is a changed version of an original document sent previously. When a user sends a document to a recipient and the recipient edits the document and sends it back to the user, Workshare Compare can automatically detect that the received attachment is a changed version of the original document. The user can then launch a comparison of the two documents from Microsoft Outlook and view the Redline document in Workshare Compare.

Workshare Compare Benefits and Features

Workshare Compare is powerful comparison software. Its key benefits include:

- **Advanced Document Comparison**

Compare one document against multiple modified versions or revisions within context of one another. Workshare Compare utilizes an industry-leading document comparison engine to excel at long and complex documents as well as comparing auto-numbered paragraphs, font changes and complicated formatting, even in tables.

- **Compare One Document to Multiple Versions**

Compare more than two documents at one time including comparing Word-to-Word, PDF-to-PDF, Word-to-PDF and WordPerfect files.

- **Compare PDF Documents**

Compare PDF documents. The differences between two versions of a PDF document are automatically highlighted, including text and images, so you can quickly and easily identify what has changed.

- **Comparison Speed**

Run a document comparison that is 8x-10x faster than the original DeltaView comparison engine.

- **Alert and Compare - Redlines from Outlook**

Generate a Redline document from Microsoft Outlook. Alert and Compare is the ability of Workshare Compare to automatically detect that a received attachment is a changed version of an original document sent previously. When a user sends a document to a recipient and the recipient edits the document and sends it back to the user, Workshare Compare can automatically detect that the received attachment is a changed version of the original document. The user can then launch a comparison of the two documents from Microsoft Outlook and view the Redline document in Workshare Compare.

- **Multiple Comparison Interfaces**

Compare email attachments directly from your email application, utilize the standalone document comparison tool from the desktop without launching Microsoft Word, or work within Microsoft Word to compare documents without having to learn a new software application.

- **Unicode Compliance**

Complete support for Unicode language documents and operating systems.

- **Extend Your Document Management System**

Leverage Workshare Compare with your existing document management system. For example, Workshare Compare provides a list of the DMS versions of a document, enabling the comparison of document versions.

What's New in Workshare Compare 7 FP1

Workshare Compare 7 FP1 is a product quality release with improvements as well as the following new features:

- Workshare Compare - Ability to save a Redline (comparison) document as a Track Change document.
- Workshare Compare - Ability to save a Redline (comparison) document as a PDF file.
- Workshare Compare - Ability to specify a default Redline file name as well as include DMS document descriptions/locations in the file name.
- Workshare Configuration Manager – Administrator user can hide locked parameters so that users cannot see them in User Mode.

System Requirements

The certified environments for Workshare Compare are as follows:

Minimum System Requirements	Intel Pentium 4 2.8GHz processor (XP) or Intel Pentium 4 3.2GHz processor (Vista/7) 1GB RAM (XP) or 1.5GB RAM (Vista/7) 1GB free disk space
Recommended System Requirements	Intel Core 2 DUO @ 2.2GHz AMD Athlon 64 X2 4400+ 2GB RAM 2GB free disk space

Operating System:

- Microsoft Windows XP SP3
- Microsoft Windows Vista SP2 (32 bit and 64 bit) - UAC disabled
- Microsoft Windows 7 (32 bit and 64 bit) – default UAC
- Microsoft Windows 7 SP1 (32 bit and 64 bit) – default UAC

Citrix:

The following Citrix environments are supported:

- Citrix Presentation Server 4.5
- Citrix XenDesktop 5
- Citrix XenDesktop 5.5
- Citrix XenApp 5
- Citrix XenApp 6
- Citrix XenApp 6.5

They are supported when running on the following:

- Microsoft Windows 2003 Server (32 and 64 bit)
- Microsoft Windows 2003 R2 Server (32 and 64 bit)
- Microsoft Windows 2008 Server (64 bit)
- Microsoft Windows 2008 R2 Server (64 bit)

Note: Check with your Citrix vendor about which Windows operating system supports your version of Citrix.

Microsoft Office System:

- Microsoft Office 2010 (32-bit)
- Microsoft Office 2010 SP1 (32-bit)
- Microsoft Office 2007 SP2
- Microsoft Office 2003 SP3

Email System:

- Microsoft Outlook 2010 (32-bit)
- Microsoft Outlook 2010 SP1 (32-bit)
- Microsoft Outlook 2007 SP2
- Microsoft Outlook 2003 SP3
- IBM Lotus Notes 8.x

Other:

- Microsoft .NET Framework 4.0
- Windows Installer (x86), version 3.1.0.0

SharePoint:

- Microsoft Office SharePoint 2010
- Microsoft Office SharePoint Server 2007

DMS Integration:

Note: Check with your DMS vendor about which Windows operating system supports your DMS.

- **Autonomy iManage:**
 - FileSite / DeskSite Client 8.2 SP2 (Patch 2a)
 - FileSite / DeskSite Client 8.5 SP3 Update 1
 - FileSite / DeskSite Client 8.5 SP3 Update 3
- **Open Text:**
 - Hummingbird DM 5.1.0.5, ODMA (SR6)
 - Hummingbird DM 5.2.1 ODMA and COM (CU6)
 - Hummingbird DM 6.0.5 ODMA and COM (CU4)
 - eDOCS DM 5.3 COM only (Patch 2)

- eDOCS DM 5.3 COM only (Patch 4)

Note: *Worldox integration is supplied and supported by Worldox.*

Workshare will endeavor to support future service packs of certified environments.

Important Information

- **Secure PDFs** – Workshare Compare is unable to compare secure PDFs or convert secure PDFs to DOC format. Secure PDFs are PDF files with security settings configured.
- **Licensing** – If the product is licensed on subscription basis, one month before your subscription license expires, you can choose to receive a popup Expiry Notice on a daily basis. You can configure Workshare Compare so that the Expiry Notice is displayed/not displayed as required. For further information, refer to the Licensing Workshare section in the Workshare Installation Guide.

Important Installation Information

- Workshare Compare installs program files to a sub-folder within the Workshare folder named **Modules**.
- **Install:** A user is unable to install Workshare Compare if Microsoft Windows Installer 3.1 is not installed. This can be downloaded from the following location <http://www.microsoft.com/downloads/details.aspx?FamilyID=889482FC-5F56-4A38-B838-DE776FD4138C&displaylang=en>.
- **Windows Vista:** For MSI installs the user must have administrative privileges for the Default Mail Client.
- **Internet Explorer:** You must ensure that your email application is set as the default mail program in Internet Explorer. In Internet Explorer, select **Internet Options** from the *Tools* menu. In the **Programs** tab, select your email program (Microsoft Outlook) from the **E-Mail** dropdown list. If this is not done, you will not be able to send a document for review.
- **Windows 7:** When UAC is set to **Default**, running the Workshare Compare install displays the UAC prompt. You must approve the prompt and Workshare Compare will be installed. Running the Workshare Compare MSI silently will fail when UAC is set to **Default** because the user is not given the opportunity to approve the UAC prompt. Therefore for silent installs, disable UAC.

If you have installed any Alpha or Beta builds of Workshare Compare, we strongly recommend that you first uninstall them before installing Workshare Compare 7.

Known Issues

The following are known issues in the Workshare Compare 7 FP1 release - for more information, please contact Customer Support.

TFS ID	Details
2705	<p>Editing Redline Documents - DeskSite 8.5 SP2/Windows 7/Office 2010</p> <p>The Local Save and Local Open options are not available when editing Redline documents from Workshare Compare.</p>
3454	<p>Licensing with Proxy Server</p> <p>It is not possible to license Workshare Professional using proxy server settings.</p>
3800	<p>Saving Redlines Default Format – Office 2003</p> <p>When saving a Redline document to a DMS, the default format specified in the Workshare Configuration Manager is not remembered. The default format is always WDF.</p>
4010	<p>SharePoint and the Workshare Configuration Assistant</p> <p>When SharePoint is set as the default document provider, a Workshare dialog asking for the paths to SharePoint sites is displayed while running the Workshare Configuration Assistant in Normal user.</p>
4245	<p>Fast Comparison Mode</p> <p>The Fast option in the Comparison Mode dropdown list should only be available when comparing a DOC file against another DOC file. However, it is also available when comparing a DOCX file against DOC/DOCX/PDF/TXT files.</p>
4315	<p>Locking Configuration Options</p> <p>When locking configuration options and applying to the current user, the configuration options are still locked for other users of the machine.</p>
4326	<p>Email as Track Changes</p> <p>The <i>Workshare Open PDF in Word</i> dialog is displayed when the Email as Track Changes option is selected from the Workshare Compare window.</p>
4331	<p>SharePoint Profiling</p> <p>When Workshare Compare is integrated with SharePoint and you save a Redline document into a location that requires profiling, the profile dialog blue title band is drawn incorrectly.</p>
4356	<p>User Override</p> <p>Deselecting the Allow users to override option values parameter in Administrator Mode is not correctly disabling user abilities to modify parameters in User Mode.</p>
4373	<p>Workshare Compare – Autonomy iManage</p> <p>When comparing documents from Autonomy iManage, the document paths displayed in the Modified Document dropdown list are incorrect - they point to a local temp directory instead of the WorkSite path.</p>
4380	<p>Apply Change Markers</p> <p>The Apply Change marker images are not displaying correctly in the Redline document.</p>

TFS ID	Details
4454	<p>Workshare Compare Keyboard Shortcuts</p> <p>In Workshare Compare, the Ctrl + A shortcut is shown for both the right-click Select All option and the Save As option. In fact it is the shortcut for the Save As option.</p>
4458	<p>ABBYY OCR</p> <p>ABBYY OCR server settings applied as an admin user are used when comparing image-based PDFs as an admin user but are not used when working as a normal user.</p>
4473	<p>Comparing Unsaved Documents</p> <p>An error is displayed when clicking Compare for an unsaved document.</p>
4479	<p>Alert and Compare</p> <p>The configuration parameters relating to Alert and Compare (Comparison > Administration category) are not clearly named.</p>
4483	<p>Alert and Compare</p> <p>The Alert and Compare runtime policy is being installed during installation even though the 'Alert & Compare' option is disabled by default.</p>
4558	<p>Compare</p> <p>The icons for 'Swap' and 'Rendering set' are missing on the Document Selection dialog.</p>
4587	<p>Alert and Compare</p> <p>'Ready Redline Document Tracking' is being displayed instead of 'Attachment(s) Alert & Compare' on the progress bar of the 'Default' profile while sending email to an external recipient.</p>
4603	<p>Comparing Embedded Document</p> <p>An error message is displayed when comparing (using the right-click option) two DOC files where one file includes an embedded document.</p>
4618	<p>Comparing Multiple Files</p> <p>When comparing multiple files, the comparison mode and Rendering sets information may not be properly updated for each comparison.</p>
4623	<p>Save As to DMS</p> <p>Saving a comparison as a new version to a DMS may fail.</p>
4647	<p>Workshare Compare – Keyboard Shortcuts</p> <p>The keyboard shortcuts Alt+R and Alt +V are not functioning in Workshare Compare.</p>
4698	<p>Installation</p> <p>The Workshare installation does not resume after rebooting during the install process when necessary.</p>
4721	<p>Compare from Word</p> <p>If the user has moved and docked the Workshare Panel and then performs a compare within Microsoft Word, the comparison fails.</p>
4722	<p>Autonomy iManage</p> <p>The right-click Workshare options are disabled for document shortcut links in Autonomy iManage.</p>

TFS ID	Details
4875	<p>Workshare Configuration Manager - Deployment Icon</p> <p>In Administrator Mode, when clicking the padlock icon to unlock/lock a parameter the green arrow deployment icon is not being created.</p>
4880	<p>Redline Summary</p> <p>The Count heading in the Statistics section of the Redline Summary is left justified instead of right justified.</p>
4931	<p>UI Issue</p> <p>When opening a document from a DMS and clicking Compare, there is a space missing between the version number and 'of' in the Information section of the Workshare Panel.</p>
4938	<p>Workshare Compare – Synchronization</p> <p>When a modified document includes a change to the title, selecting this change in the Change Summary window may cause a loss of synchronization between the Source Documents and the Redline document.</p>
4984	<p>Saving Redlines to SharePoint</p> <p>Saving a Redline document to SharePoint does not use the default format specified in the Workshare Configuration Manager.</p>
4996	<p>WorkSite 9.0</p> <p>The Workshare options are not present in the right-click menu in DeskSite/FileSite 9.0.</p>
4998	<p>Redemption DLL</p> <p>Installing Workshare Professional 7 over Workshare Professional 5.2 SR3 FP3 removes the Registry keys pointing to Redemption.dll (version 4.8).</p>
5055	<p>Upgrade - Workshare Compare</p> <p>After upgrading from Workshare Compare to the latest Workshare Compare, 'Workshare Professional' is displayed in the Programs list in the Control Panel.</p>
5073	<p>Default Outlook Font</p> <p>When emailing from Workshare Compare, the default Outlook font is not used.</p>
5092	<p>Comparing - Long File Names</p> <p>After comparing documents with long file names (76 or more) and selecting to email the Redline document, the user cannot drag and drop the Redline document to another email.</p>
5099	<p>Comparing – File Formats</p> <p>The Change Summary display may present changes slightly differently depending on whether DOC or DOCX files have been compared.</p>
5188	<p>Compare - Detecting Changes</p> <p>Data in a Word document that is changed to column format is not detected as moved from one place to another in the Redline document.</p>
5222	<p>Compare – Table Auto Numbering</p> <p>Table auto numbering changes are displayed in a Redline document as inserted/deleted rows rather than cell content changes.</p>

TFS ID	Details
5233	<p>Convert to Track Change Document</p> <p>When converting a Redline to a Track Change document, an extra section break and page at the end of the document are displayed.</p>
5266	<p>Compare – Windows 7 SP1 x86</p> <p>An error may be displayed when clicking Compare in the Workshare Ribbon when the document has not been saved.</p>
5270	<p>ABBYY OCR Configuration</p> <p>ABBYY OCR server configuration is not included in Deployment Scripts saved via the Workshare Configuration Manager.</p>
5298	<p>Table Alignment</p> <p>After comparison, table alignment for insertions and deletions may be inaccurate in the saved Redline document.</p>
5441	<p>Compare from Word</p> <p>When comparing within Word, the navigation keys are not working properly when images are present in the changes.</p>
5480	<p>ABBYY OCR</p> <p>The 'SolidPDFUseOCR' Registry option is not working as expected while comparing image-based PDF documents.</p>
5498	<p>Workshare Configuration Manager - WSO File</p> <p>The When sending an email with attachments show parameter setting does not get saved when saving the configuration as a WSO (Workshare Options) file and reloading into the Workshare Configuration Manager.</p>
5509	<p>Workshare Compare - Classic View</p> <p>In Classic View of Workshare Compare the Email option is spelled incorrectly.</p>
5518	<p>Sending Redline Documents</p> <p>A user is able to send a Redline document as a PDF file when the Allow users to change email attachment format parameter is NOT selected and the Default email attachment format parameter is set to WDF.</p>
5521	<p>SharePoint Unicode Documents</p> <p>When comparing server documents, the name of Unicode documents is not shown correctly in the title of the Compare window.</p>
5523	<p>Emailing PDFs - Outlook 2010</p> <p>The Workshare ribbon with the Compare Attachment with Workshare option is not available when a PDF document is sent using the File > Attach to Email option.</p>
5535	<p>Saving Redline Document – Document Description</p> <p>The Include document descriptions in the Redline file name parameter in the Workshare Configuration Manager (Integrations > General category) is not working as expected for local file system documents.</p>

TFS ID	Details
5536	<p>Saving Redline Document – Document Location</p> <p>The Include document locations in the Redline file name parameter in the Workshare Configuration Manager (Integrations > General category) is not working as expected for local file system documents.</p>
5568	<p>Compare - Text Only Mode</p> <p>The comparison is not performed when comparing a server PDF document with other documents in 'Text Only' mode.</p>
5569	<p>Customizing Quick Access Toolbar</p> <p>A comparison may not perform correctly after customizing the Quick Access toolbar.</p>
5574	<p>Comparing Password-Protected Documents</p> <p>When comparing password-protected documents, a user is prompted for passwords before the comparison is performed and visible instances of winwords are created and not closed even after entering a correct password.</p>
5576	<p>Compare - Quick Access Toolbar</p> <p>After adding the choice of rendering sets to the Quick Access Toolbar in Workshare Compare and then closing Workshare Compare, the rendering sets are not retained in the Quick Access Toolbar when Workshare Compare is relaunched.</p>
5579	<p>Compare – PDF Options</p> <p>The Convert to PDF and Convert to PDF and Email options (Home ribbon, Actions group) are also available in the standalone Compare application.</p>
5602	<p>Saving Redline to SharePoint</p> <p>An error message is displayed when overwriting existing WWB/WDF/PDF files after enabling the Profile New Documents option.</p>
5619	<p>Rendering Set – Ignore Field Codes</p> <p>When selecting to ignore field codes in Comparison Options (Rendering Set Manager) and comparing documents with table of contents, the field codes in the TOC are still compared.</p>
5620	<p>Convert to Track Change Document – Cross References</p> <p>When converting a comparison to a Track Changes document, cross-reference fields are not retained.</p>
5623	<p>Convert to Track Change Document – Compatibility Mode</p> <p>When converting a comparison to a Track Changes document, the resulting Word document displays in Compatibility Mode.</p>
5625	<p>Convert to Track Change Document – List Numbering</p> <p>When converting a comparison to a Track Changes document, the list numbering is not displayed as a change.</p>
5627	<p>Convert to Track Change Document – Tables</p> <p>When converting a comparison to a Track Changes document, accepting/rejecting does not enable a user to shift cells, only to apply the cell contents.</p>

TFS ID	Details
5654	<p>Adding Server Details</p> <p>Users are able to add Interwoven server details in the Workshare Configuration Manager Administrator Mode.</p>
5675	<p>Amyuni 450 Update</p> <p>The contents of the original PDF are not concatenated accurately after updating Amyuni Driver.</p>
5676	<p>Rendering Sets</p> <p>Rendering set options are not retained after applying and re-launching the Rendering Set Manager.</p>
5677	<p>Convert to Track Change Document – Text Error</p> <p>An error message 'Failed to run Act on Changes..' is displayed when selecting to Convert to Track Changes after saving the comparison as a PDF file.</p>
5680	<p>Closing Comparisons</p> <p>When the File > Close option in Workshare Compare has been disabled (Enable 'Close' parameter), when using the Exit button (in the File menu), the comparison is closed without prompting to save.</p>
5691	<p>Emailing Comparison Documents</p> <p>After comparing PDF and TXT files and saving the Redline document as a WDF file, emailing the WDF file as a comparison document to an external recipient and including the original and modified documents, the recipient will be unable to open the original and modified documents (they are corrupted) although the recipient can open the WDF file.</p>
5692	<p>Text Only Mode</p> <p>After comparing any two supported documents in text only mode and then saving the comparison as a WDF file, when a user relaunches the saved comparison and changes the Comparison Mode from Text Only to Standard, the comparison is still shown in text only mode.</p>
5697	<p>Edit Rendering Set</p> <p>Workshare Compare may crash when applying changes made after selecting to edit the Rendering set.</p>
5701	<p>Comparison Mode – Windows 7</p> <p>Settings selected in the Workshare Compare main window are retained when opening subsequent comparisons except for the Comparison Mode.</p>
5714	<p>Convert to Track Change Document</p> <p>After comparing two server documents and selecting Convert to Track Change document, the comparison is opened in Word with the changes shown as track changes. However, if in Workshare Compare, Convert to Track Change document is selected again, an error is displayed.</p>

Change Requests Addressed

The following Change Requests have been addressed in Workshare Compare 7 FP1 (Build 10000.3000). Please note that some of these issues were specific to customer environments. For more information, please contact Customer Support.

TFS ID	CR Number	Description
4585	00157141	Uitlijn Word add-in slows down with Workshare.
4781	00160693	Redline statistics placed on first page if 'Allow Users to Override' is disabled.
4784	00160968	Comparing documents with specific field codes results in Redlines being poorly displayed when saved to .doc, .docx and .rtf formats.
4793	00161170	Workshare Configuration Manager (WCM) will not open successfully.
4812	00161220	Documents containing tabs instead of first line indents cause Redlines to be incorrectly rendered.
4870	00162368	Unable to perform request: Unexpected exception using the Workshare Ribbon.
4885	00162625	Incorrect font is displayed when editing or saving a Redline.
4910	00162992	Workshare Outlook add-in is preventing Quest Archive Manager from archiving emails.
4943	00163424	Document numbering incorrectly displayed after comparison.
4944	00160169	The option 'Append document IDs to the Redline filename' replaces the file name instead of appending.
5005	00163063	Request ability to disable and lock down Change Summary.
5051	00164191	Error Code - 30 saving redline as PDF.
5095	00164454	Running the Workshare Configuration Assistant disables Outlook integration.
5120	00161788	Ability to configure save as DMS version option through WCM user interface.
5121	00121359	Ability to remove the file names from the Input part of Redline statistics.
5123	00160629	Show Hidden Text' no longer available in Rendering Set Manager.
5124	00160628	Tooltip showing Redline document names missing in Compare.
5125	00160100	Office 2003 specific - "Home" and "Back" buttons are disabled for different options in Workshare Panel.
5127	00129093	Ability to save comparison as Track Changes document.
5130	00163003 00162819 00161909 00155507	Ability to retain all document elements (e.g. Field Codes, Cross References, Attached Templates) when comparing.
5133	00161140	Ability to force lock the "Hide Options I cannot change" option.

TFS ID	CR Number	Description
5136		Embedded emails that have previously been used via Alert and Compare cannot be opened from Sent items folder.
5139		Numbering is incorrect when comparing attached documents and saving the Redline as a DOCX document.
5141	00156731	Documents of a certain file name length fail to compare in Standard mode.
5143	00157968	Request that the ability to change document format when sending a Redline be made obvious.
5147	00146349 00161378	Documents that contain special symbol in name are not listed under 'Compare attachments with Workshare' option.
5148	00155136	Function cannot be performed because the object has been deleted.
5149		Load Defaults' is not working as expected when options in WCM are locked.
5151	00160742	Saving ADM file over itself from WCM appends options.
5154		Detect Changes to Images' and 'Ignore Case Changes and Ignore Text Boxes' options in Rendering set are not working when compared with in word.
5156	00161731	When the 2 attached documents are compared table rendering is inaccurate in the saved Redline.
5157		Options are not being un-deployed by clicking on the deployment icon.
5158		ADM template for Workshare in the Group Policy Management Console does not create the setting "IgnoredUserOverrides" for all sub categories within the WCM.
5159		ADM settings saved as registry target 'HKCU' with '32 bit Workshare on 64 bit OS' are not retained in x64 environments in user mode of WCM.
5160	00149342	Ability to save Redline as Word 2010 Document (*.docx).
5164	00160714	Unable to browse to sites within Virtual Directories in SharePoint.
5165	00161372	Saving custom paths to REG file via WCM not functioning correctly.
5167		Ability to display progress bar when saving files/Redlines as PDF or opening PDF in Word.
5168		Ignore Tables' option in Rendering set is not working when compared with in word.
5169		Instance options are being saved to the deployment script regardless of the deployment icon state.
5170		Admin only options are present in IgnoredUserOverrides folder.
5171		When upgrading from previous releases certain configuration options are not being upgraded.
5173		"Discard Changes" confirmation dialog is shown when closing WCM even though no changes were made.
5174		WCA Help gives reference to ini files.
5175	00161965	Failed to open a stream on a file - OnWriteComplete error.

TFS ID	CR Number	Description
5180	00162437	Workshare Configuration Manager hover tooltip "Default Value" does not reflect out of the box Default Value.
5182	00162106	Table cell moves showing as inserted/deleted rather than moves.
5220	00128979	Ability to automatically populate Modified Document field when comparing Interwoven versions.
5223	00165139	Compare crashes when printing Original/Modified documents when using Redline only view.
5226		Compositor changes for supporting new Review module for compare service and catalyst.
5238	00156344	Unable to save Redline to WorkSite as application type incorrectly populated.
5242	00161385	Split Word format to 'doc and docx' for 'Default email attachment format' when emailing Redline.
5246		Issues related to Registry options migration after upgrading to 7.0 builds.
5259		WCM Crash is observed while loading a .wso file.
5260		Prompt users to view/find Saved redline PDF.
5463	00160709	Ability to set default Redline name to include a prefix.
